

# Google Santa Monica Dan Kegel

# Google Santa Monica: Introduction

- **Xdg-utils good, let's extend it**
- **Shipping consumer app (Picasa)**
- **Developing Zumastor (like netapp, zfs)**
- **Sponsoring Wine improvements**

# Wish List

- **file manager: xdg-open-folder-highlight-file**
- **screen saver interface: xdg-add-screensaver**
- **web: xdg-add-mimetype, xdg-add-protocol**
- **pkg manager interface: xdg-add-trusted-repo**
- **32 bit library pkgs on 64 bit ubuntu**
- **Stable, fast CJK fonts**
- **Stable OpenSSL abi**
- **Easier inotify (cf. FindFirstChangeNotification)**

# Challenges

- **So many bugs, so little time**
- **Tools wish list**
  - Valgrind and UML?
  - Libmudflap and third party libraries?
  - Static analysis for filesystems (Engler's eXplode?)
